# Deep Creep

Safety Data Sheet

Date of issue: 10-01-2019

SECTION 1: Identification		
Product Name	:Deep Creep	
Other means of identification Product code	DC14	
Recommended use	Lubricating and penetrating oil.	
Recommended restrictions	None known.	
Manufacturer/Importer/Supplier	/Distributor information	
Supplier	Durkin Enterprises, Inc.	
Address	26 Cedar Lane	
	Mono Ontario L9W 6C8	
	Canada	
Telephone	416-259-2699	
Manufacturer	Sea Foam International, Inc.	
Address	1110 College Drive	
	Bismarck, ND 58501	
	USA	
Telephone	701-751-7363 701-425-0391	
Fax	INFOTRAC: (800) 535-5053 (Within Continen	tal US): (352) 323-3500 (Outside US)
Emergency telephone		volving a spill, leak, fire, exposure or accident
	involving chemicals)	
SECTION 2: Hazard identification	aation	
Physical hazards	Flammable aerosols	Category 1
-	Gases under pressure	Compressed gas
Health hazards	Skin corrosion/irritation	Category 2
	Specific target organ toxicity following single exposure	Category 3 narcotic effects
	Aspiration hazard	Category 1
Label elements		
Signal word	Danger	
Hazard statement		nder pressure; may explode if heated. Causes skin May be fatal if swallowed and enters airways.
Precautionary statements		
Prevention	Do not spray on an open flame or other ignitic	pen flames and other ignition sources. No smoking. on source. Do not pierce or burn, even after use. proughly after handling. Use only outdoors or in a
Response	SKIN: Wash with plenty of water. If skin irritati	I CENTRE/doctor. Do NOT induce vomiting. IF ON on occurs: Get medical advice/attention. Take off se. IF INHALED: Remove person to fresh air and N CENTRE/doctor if you feel unwell.
Storage	Keep container tightly closed. Store locked up place. Do not expose to temperatures exceed	<ul> <li>Protect from sunlight. Store in a well-ventilated ing 50°C/122°F.</li> </ul>
Deep Creep	EN (English)	SDS Canada

**Disposal:** Dispose of contents/container in accordance with local/regional/national/international regulations. **Other hazards:** None known.

present is confidential business information. HMIRA Registry Number: 03343838 - Filing Date: 2019.10.01

SECTION 4: First-aid measur	es
Inhalation	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a poison centre or doctor/physician if you feel unwell.
Skin contact	Remove contaminated clothing. Wash with plenty of soap and water. If skin irritation occurs: Get medical advice/attention. Wash contaminated clothing before reuse.
Eye contact	Rinse with water. Get medical attention if irritation develops and persists.
Ingestion	Call a physician or poison control centre immediately. Rinse mouth. Do not induce vomiting. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs.
Most important symptoms/effects, acute and delayed	Aspiration may cause pulmonary oedema and pneumonitis. May cause drowsiness and dizziness. Headache. Nausea, vomiting. Skin irritation. May cause redness and pain.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.
SECTION 5: Fire-fighting mea	asures
Suitable extinguishing media	Water fog. Alcohol resistant foam. Dry chemical powder. Carbon dioxide (CO2).
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	Contents under pressure. Pressurised container may explode when exposed to heat or flame. During fire, gases hazardous to health may be formed. Combustion products may include: carbon oxides.
Special protective equipment and precautions for firefighters	Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.
Fire fighting equipment/instructions	In case of fire: Stop leak if safe to do so. Move containers from fire area if you can do so without risk. Containers should be cooled with water to prevent vapour pressure build up. Fight fire from protected location or safe distance.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk.
General fire hazards	Extremely flammable aerosol. Contents under pressure. Pressurised container may explode when exposed to heat or flame.
<b>SECTION 6: Accidental release</b>	
Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Many gases are heavier than air and will spread along ground and collect in low or confined areas (sewers, basements, tanks). Wear appropriate protective equipment and clothing during clean-up. Avoid breathing mist/vapours/spray. Emergency personnel need self-contained breathing equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Deep Creep	EN (English) SDS Canada

Methods and materials for containment and cleaning up	Stop leak if you can do so without risk. Move the aerosol cans to a safe and open area if the leak is irreparable. Isolate area until gas has dispersed. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Keep combustibles (wood, paper, oil etc) away from spilled material. Prevent entry into waterways, sewer, basements or confined areas.
	Pick up undamaged aerosol cans mechanically. Dike leaked material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Scoop up used absorbent into drums or other appropriate container. Following product recovery, flush area with water. Collect runoff for recycling or disposal as potential hazardous waste.
	Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.
<b>SECTION 7: Handling and sto</b>	prage
Precautions for safe handling	Pressurised container: Do not pierce or burn, even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material When using do not smoke. Protect containers from damage. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition.
	Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Avoid breathing mist/vapours/spray. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Wash hands thoroughly after handling. Avoid release to the environment. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store locked up. Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C. Keep away from heat, sparks and open flame. This material can accumulate static charge which may cause spark and become an ignition source. Prevent electrostatic charge build-up by using common bonding and grounding techniques. Store in tightly closed container. Store in a well-ventilated place. Stored containers should be periodically checked for general condition and leakage. Store away from incompatible materials (see section 10 of the SDS).

Appearance	
Physical state	Liquid.
Form	Aerosol spray can - Pressurized Liquid.
Colour	Colourless.

Odour	Petroleum hydrocarbon.
Odour threshold	Not available.
рН	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	82.2 °C (180 °F)
Flash point	12.8 °C (55.0 °F) Tag closed cup
Evaporation rate	< 1
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or exp	losive limits
Flammability limit - lower (%)	2.1 % v/v
Flammability limit - upper (%)	8.5 % v/v
Vapour pressure	80 - 90 psig
Vapour density	> 1 (Air=1)
Relative density	0.77 (H2O=1)
Solubility(ies)	
Solubility (water)	(0.1% - 1%) Slightly soluble.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Heat of combustion	34 kJ/g
Oxidising properties	Not oxidising.
SECTION 10: Stability and re	activity
Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous	No dangerous reaction known under conditions of normal use.

Conditions to avoid	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Protect against direct sunlight. Contact with incompatible materials.
Incompatible materials	Acids. Strong oxidising agents. Chlorine. Isocyanates.
Hazardous decomposition	No hazardous decomposition products are known.

Hazardous decomposition products

reactions

## **SECTION 11: Toxicological information**

Information on likely routes of	exposure
Inhalation	May cause drowsiness and dizziness. Prolonged inhalation may be harmful.
Skin contact	Causes skin irritation.
Eye contact	Direct contact with eyes may cause temporary irritation.
Ingestion	Droplets of the product aspirated into the lungs through ingestion or vomiting may cause a serious chemical pneumonia.
Symptoms related to the physical, chemical and toxicological characteristics	Aspiration may cause pulmonary oedema and pneumonitis. May cause drowsiness and dizziness. Headache. Nausea, vomiting. Skin irritation. May cause redness and pain.
Information on toxicological ef	fects
Acute toxicity	Not expected to be acutely toxic.

Components	Species	Test Results	
Isopropanol (CAS 67-63-0)			
<u>Acute</u>			
Dermal			
LD50	Rabbit	12870 mg/kg	
Inhalation			
Vapour			
LC50	Rat	72.6 mg/l, 4 hours	
Oral		4740	
LD50	Rat	4710 mg/kg	
Skin corrosion/irritation	Causes skin irritation.		
Serious eye damage/eye irritation	Direct contact with eyes may cause temporary irritation.		
Respiratory or skin sensitisation	n		
Respiratory sensitisation	Not a respiratory sensitiser.		
Skin sensitisation	This product is not expected to cause skin sensitisation.		
Germ cell mutagenicity	No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.		
Carcinogenicity	Not classifiable as to carcinogenicity to humans.		
ACGIH Carcinogens			
Isopropanol (CAS 67-63-0) Canada - Manitoba OELs: carcinogenicity		A4 Not classifiable as a human carcinogen.	
Isopropanol (CAS 67-63-0) Not classifiable as a human carcinogen.		Not classifiable as a human carcinogen.	
	Evaluation of Carcinogenicity		
Isopropanol (CAS 67-63-	•	3 Not classifiable as to carcinogenicity to humans.	
Reproductive toxicity	This product is not expected to cause reproductive or developmental effects.		
Specific target organ toxicity - single exposure	May cause drowsiness and dizziness.		
Specific target organ toxicity -	Not classified.		
repeated exposure			
Aspiration hazard	May be fatal if swallowed and enters airways.		
Chronic effects	Prolonged inhalation may be harmful.		
Further information	Intentional misuse by concentrating and inhaling the product can be harmful or fatal.		
SECTION 12: Ecological info			
Ecotoxicity	May cause long-term adverse	effects in the aquatic environment.	
Persistence and degradability	No data is available on the degradability of this product.		

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow) Isopropanol (CAS 67-63-0)

Mobility in soilThe product is slightly soluble in water.Other adverse effectsThe product contains volatile organic compounds which have a photochemical ozone creation<br/>potential.

0.05

## **SECTION 13: Disposal considerations**

Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Contents under pressure. Do not puncture, incinerate or crush. Incinerate the material under controlled conditions in an approved incinerator. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.		
Local disposal regulations	Dispose in accordance with all applicable regulations.		
Hazardous waste code	The waste code should be assigned in discussion between the user, the producer and the waste disposal company.		
Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).		
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal. Do not re-use empty containers.
